

This is my final project description with some screen shoots it similar with the requirements of your project. So I think it wouldn't be that hard for me.

Seraye Job Portal is poised to emerge as a startup specializing in management systems in 2024. This innovative platform will cater to the needs of both employers and job seekers, aiming to streamline the recruitment process and bridge the talent gap within Ethiopia.

Sample code screen shoot of view model and urls

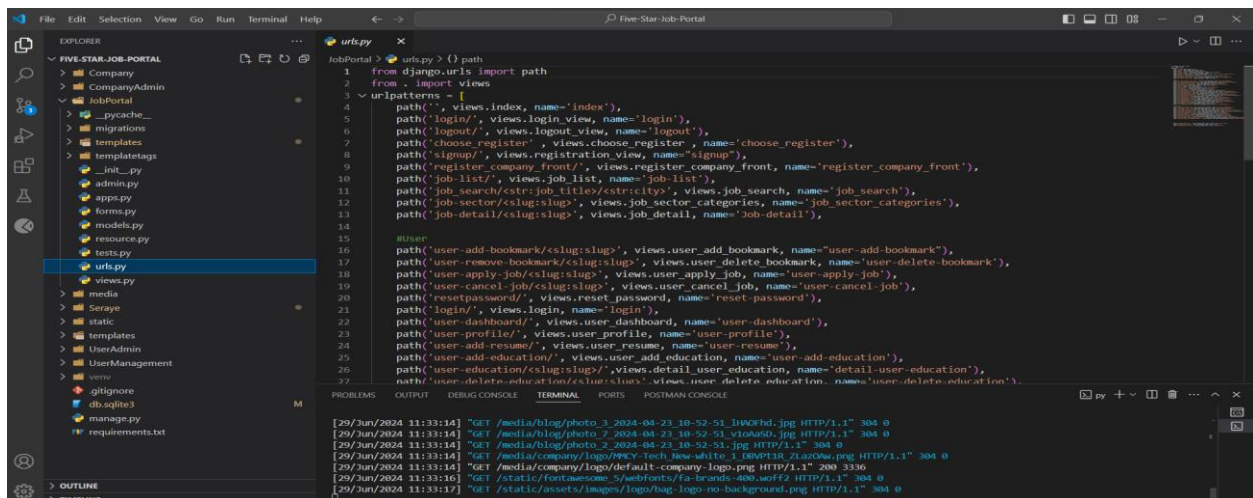

```
models.py
class UserSkill(models.Model):
    candidate = models.ForeignKey(Candidate, on_delete=models.CASCADE)
    skill = models.ForeignKey("Skill", on_delete=models.CASCADE)
    validated = models.BooleanField(default=False)

    def __str__(self) -> str:
        return self.candidate.user.first_name + " " + self.skill.title

class Education(models.Model):
    candidate = models.ForeignKey(CustomUser, on_delete=models.CASCADE)
